Installation Review

"I had no idea the finished product would be so beautiful. I was also quite impressed with the installers. They were pleasant, respectful, conscientious, and courteous.

Those men gave 110% each and every day it took to install the Interlock roof.

Interlock stood by their commitment to insure I was satisfied with the work and end product. Choosing Interlock was a decision I'm glad I made. Thanks again!"

Warranty Reviews

"The warranty is definitely reassuring and the roof's good looks plus quality add considerable value to my home.

Thank you very much."

Carol

Danbury, CT

"My wife and I will not have to ever again concern ourselves with roofing problems. If our children take over our home, we have a warranty we can pass on. This also gives us both a great deal of peace of mind.

We are very happy with our Interlock Roofing System. "

Peter

Vineyard Haven, MA

"gives us both... peace of mind"

FIRE PATH

Interlock® Roofing System

Kelowna, BC Wildfire 2003

Fire Resistant

Cedar Shake Roof

Burning cedar roof - Originated on rooftop

Class "A" Fire Rated Available

Protects your home from fire caused by wind-blown sparks and embers.

Never re-roof again. **Never.**

Wind Review

"Not only does it look great, it has proven its worth during the last two winters.

As you may know, the Waterton area is quite windy in the winter and this year we experienced winds gusting to over 200 km per hour (120mph).

While our neighbors are out gluing and nailing down their asphalt shingles, we're sitting home relaxing without worrying about our roof.

Joanne and I are very pleased with the performance and features of the Interlock Roofing System."

Stephen & Joanne
Waterton Park, AB

"...we experienced winds gusting to over 200 km per hour (120 mph)."

Wind Resistant

Testing Facility, Florida

May be installed to resist hurricane force winds in excess of 165mph / 275kmh.

Never re-roof again. **Never.**

Extreme Weather Review

"The old roof had leaks in multiple areas where the asphalt shingles and flashing had failed, and ice dams that caused leaks inside the house formed with every snowfall.

We have just had 3 days of snow, sleet and freezing rain, then a quick thaw, which with the old roof on my 100 year old family home, would have meant that I would have been up on the roof removing built up ice and ice dams at the roof edge.

The peace of mind that I now have is worth the financial investment. This is the third and last roof that I expect to have installed"

Jean
Plainville, MA

"snow, sleet, and freezing rain...
The peace of mind that I now have..."

Hail Resistant

UL Certification 2218 Class 4

Achieves highest rating available for hail impact resistance.

Curbside Appeal

- Speciality Colors
- Elegant Profiles
- Resale Value

**Can you see how a roof like this improves
the curb appeal of your home?**

Investment Review

"Buying an aluminum roof is a major investment and I am sure that other customers of yours had the same initial hesitation that my wife and I did about paying extra versus staying with a conventional asphalt roof. However, once we looked at the quality of the materials and the warranty, we knew we made the right choice.

Even if we sell our house at a later date we consider our roof to be a good investment, adding thousands of dollars in value to our house."

Alan

Mississauga, ON

"we made the right choice.
...a good investment"

Pays for itself

- No more roofing costs
- Reduced cooling bills
- Enhances property value
- Does not depreciate
